LOUIS LOPEZ
CLARK DATA SYSTEMS/MICROAGE
9777 WEST GULF BANK
HOUSTON, TX. 77082

Dear Louis,

Congratulations on successfully maintaining your status as a Compaq/NetWare Accredited Systems Engineer. The Accredited Systems Engineer (ASE) Certification is the highest title awarded by Compaq recognizing your expertise in Compaq product knowledge and integration. This renewal packet includes your:

- > ASE Certificate of Accreditation
- > ASE Identification Card
- > ASE ID Number **1107443**

Additionally as a Compaq ASE, you will continue to receive your exclusive benefits such as invitations to ASE Sneak Previews, and subscriptions to Compaq tools like TechNotes, Compaq Support CDs, QuickFind, and SmartStart.

As in the past, continued new product training may periodically be necessary in order to keep you up-to-date with the latest in technology and products from Compaq. If any such training requirements arise, you will be notified by Compaq. It is important to note that completion of this training is required to maintain your status as a Compaq ASE.

Compaq is glad to have you on our team. We hope that you find the Accredited Systems Engineer Program a benefit to yourself, your business, and your customer-base. If you have any questions or comments regarding the Compaq ASE Program, please call me at 281-514-2266 or email us at ASE.Program@Compaq.com.

Sincerely,

Diana L. Taylor
ASE Program Administrator
